

New Entrance from the Old Kent Road

Road

- Improved and enhanced entrance from the Old Kent Road.
- Planting either side of the entrance, providing a green buffer between the road and the park.
- Retaining existing trees, retaining the park's feeling of maturity and ensuring biodiversity is maximised.
- Introduction of bollards to deter mopeds and cars from entering the park.

Relocated Outdoor Gym Equipment

- Retaining the existing outdoor gym equipment but relocating it and repairing it where necessary to allow for improved circulation through the park.

Shared Cycle Path

- Brimmington park will be part of the new cycle route that runs from Rotherhithe to Peckham

New Interactive 'Toro' Pitch

- A new free to use 10m x 10m Toro pitch. The Toro pitch has interactive goals and provides a range of different games to play.

The amended design takes into account comments received at the first consultation in September 2019:

- ① Respondents were keen to keep the tree which was proposed for removal. The path from Clifton Crescent has now been re-aligned so the tree can be kept. There will be no tree felling for this project, and locations for new tree planting are being looked at.
- ② More benches were requested. Three benches have been added to the design, with two located in sunny spots, one located in the shade of trees with a view to watch matches on the sports pitches.
- ③ It was felt that more bicycle racks are needed. An additional bicycle racks have been added near the sports pitches, which may encourage more people to travel to the park by bicycle.
- ④ Informal play was suggested: The design now includes a natural play trail running alongside the main path, for young children to climb and balance on low natural elements including rocks, balance beams and logs.
- ⑤ People wanted to keep the outdoor gym: It will be relocated, and any broken equipment will be replaced.
- ⑥ Opinion on graffiti art was divided but generally more people wanted to keep it: The graffiti contributes to the unique character of Brimmington Park and should be retained where possible.

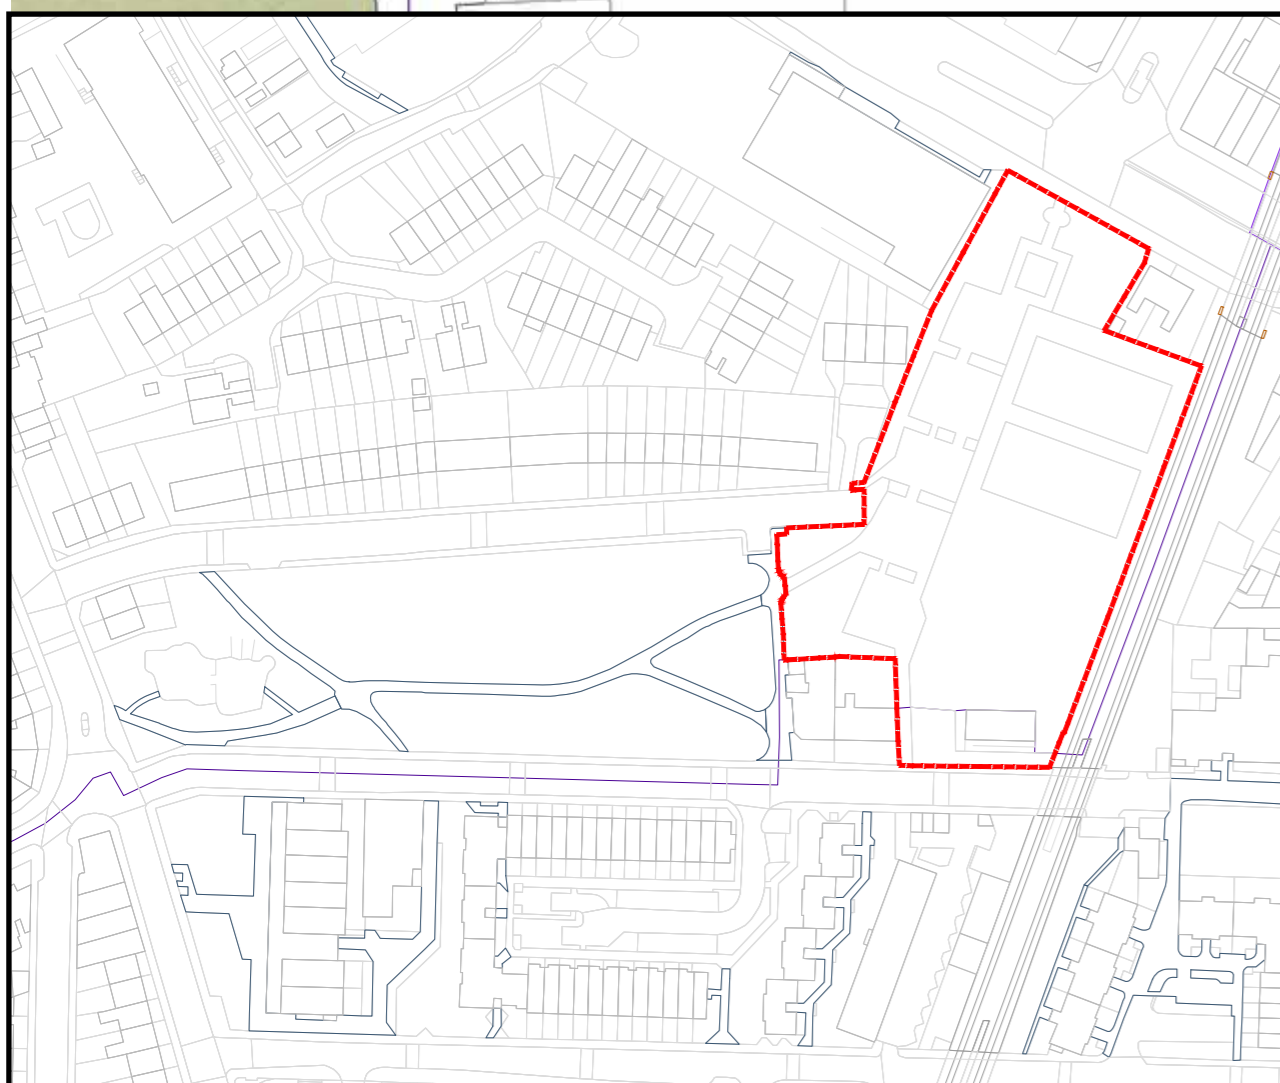

As requested in the previous consultation, the pink arrow shows the route to access the pitches via the sports centre

Refurbished 3G Pitches

- Resurfaced, floodlit 3G artificial grass pitches.
- To be configured as five, 5 a-side pitches, or 1 7 a-side pitch and three, 5 a-side pitches.
- The pitches will have a dedicated reception with controlled access through the southern end of the pitches.
- The pitches will be bookable and there will also be free access sessions. Please see the project webpage at www.southwark.gov.uk/Brimmingtonparksportscentrehub

Enhanced Entrance Space

- Entrance to the park and pitches to be re-landscaped.
- To include a 'Welcome Plaza' with ornamental herbaceous planting, whilst maintaining the existing mature trees.

Location Plan

Brimmington Park Sports Centre Hub Second Consultation Spring 2020

Existing Condition

Proposed Condition

Total new greenspace

The removal of the existing hard spaces throughout the park enable us to return 1350sqm of hard space back to soft landscaping, increasing the overall green space within Brimmington park dramatically.
