<b>Appendix 1 EQIA Supporting Datasets</b>
Appendix 2 COVID-19 Statement

## OKR AAP EQIA Appendix 1: Supporting Datasets

The data below sets out the need in the borough and the number of people with these protected characteristics. It provides evidence for who is impacted by the policies in the Old Kent Road Area Action Plan. These are taken from the JSNA data held by public health and a range of other sources national and regional sources of data, as well as the Integrated Impact Assessment baseline data and indicators.

The table identifies where do have data, and the places we would want to have more specific equalities data, but either the data is unavailable and difficult to locate or it is unobtainable due to the nature of the protected characteristic and process of obtaining that data.

This table will be updated alongside the Integrated Impact Assessment IIA to reflect the changing need and context in the borough.

The data and indicators that support each policy are set out in the Integrated Impact Assessment Appendix 9 Baseline Indicators and the data summarised in Appendix 3, these are referred to in the Full Equalities Impact Assessment.

Appendix 2 COVID-19 Statement

## COVID-19 Update to EQIA

In this time of uncertainty, LB Southwark understands that those with protected characteristics are in some cases, more vulnerable to the impacts of COVID-19.

There is no data on the extent of this yet, as the situation is emerging, but the Planning Policy Team will work alongside Public Health to understand the impact of COVID-19 on residents, and how this may alter our implementation of the policies in the NSP and alter need in the borough.

The Equalities Impact Assessment will be continually updated to reflect the changing context and impact of Covid-19 on need, and on these policies.
